

## BNC Cable for Camera

### 1- Product Overview

The BNC camera cable is designed for CCTV surveillance systems, delivering stable and high-quality video transmission in professional environments that require reliable performance.

It features a gold-plated connector to minimize signal loss and interference, along with a dual-wire design for easy and accurate installation.

The cable supports data transfer rates up to 1Gbps and is built with durable materials suitable for continuous operation in security systems.

### 2- Technical Specifications

Item	Specification
Product Name	BNC Camera Cable
Cable Type	Video Coaxial Cable
Connector Type	BNC
Connector Gender	Male
Plating	Gold-Plated
Color	White
Data Transfer Rate	Up to 1Gbps
Shape	Cylindrical
Wiring	Dual Wire
Application Type	CCTV Video Transmission
Operation Mode	Plug & Play

### 3- Performance Features

- Stable signal transmission without interruption
- Reduced interference and signal loss
- Reliable performance for continuous operation
- Gold-plated connector for enhanced connectivity
- Quick and easy installation

#### 4- Compatibility

- CCTV Cameras
- DVR Systems
- NVR Systems
- Video Surveillance Systems

#### 5- Applications

- Security systems
- Monitoring rooms
- Corporate environments
- Professional CCTV installations
- Advanced home setups

#### 6- Warranty & After-Sales

Duration	Coverage
2 Years	Replacement Warranty
5 Years	Maintenance Support

The product is supplied brand new, factory-sealed, and tested before delivery.
